## Professional Summary

Software developer who builds and ships web applications end to end — JavaScript, TypeScript and React front ends wired to REST API endpoints over SQL databases, with C#.NET and Node.js on the back end. Works from user requirements through logical and physical design, writing, modifying, integrating and testing software code, and maintaining existing programs with careful, documented fixes. Recent Tier 2 support experience adds fast root-cause analysis, precise case documentation and clear communication under tight deadlines.

## Core Skills

JavaScript, TypeScript, React.js, JSON/XML integration, software code integration and testing, maintaining existing computer programs, REST APIs, C#, .NET / ASP.NET Core, Node.js, SQL Server, PostgreSQL, MySQL, schema design, stored procedures, HTML5, CSS3, Git, CI/CD, agile/scrum, unit testing, code review, attention to detail

## Technical Skills

**Languages:** JavaScript, TypeScript, C#, Java, Python, SQL

**Frameworks & Web:** React, .NET, ASP.NET Core, Node.js, HTML5, CSS3

**Backend, APIs & Data:** REST APIs, JSON/XML integration, SQL Server, PostgreSQL, MySQL, schema design & stored procedures

**Practices & Tooling:** Git, CI/CD, agile/scrum, code review, unit testing, AI-assisted development

## Experience

### Tier 2 Technical Support Representative

Concentrix, Canada *Apr 2024 – Aug 2025*

- Resolved 30–40 escalated technical support tickets daily, diagnosing reported issues and restoring service within response targets.
- Performed root-cause analysis on recurring incidents, applied documented fixes, and escalated complex cases with clear technical detail.
- Maintained precise case records and contributed to knowledge-base documentation so repeat issues were resolved faster.

### Freelance Full-Stack Developer

Self-employed, Ontario, Canada *2022 – 2023*

- Delivered 3 client projects end to end — front end, back end, SQL database, deployment — for small-business and internal-tool clients.
- Built component-based front ends covering UI presentation and business logic, wired to REST API endpoints with clean state handling.
- Owned client communication: turned loose briefs into working products, set up hosting and version control, and kept non-technical owners informed in plain language.

### Software Developer

Arethos Venture, Mohali, India *Jan 2021 – Jul 2022*

- Developed and shipped features for client software products across UI, business logic and database layers in an agile team.
- Designed and maintained SQL schemas, queries and stored procedures, and built REST API endpoints that kept features fast and reliable.
- Applied object-oriented design patterns, wrote unit tests, participated in code reviews and story estimation, and documented technical decisions.

## Education

### Post-Graduate Diploma, Information Technology

Conestoga College, Kitchener, ON *2022 – 2023*

### B.Tech, Computer Science & Engineering

Chandigarh Group of Colleges, Landran, India *2017 – 2021*

*Additional Experience: Operations Manager, Subway (ON) · Production Operator, Greenfield Agriculture Products Inc., Kitchener, ON*
